SCRUBTEC R4

Battery powered rider scrubber dryer

- Robust, compact rider suitable for use in medium sized areas where a large walk behind scrubber dryer is not productive enough. The compact design enables cleaning in congested areas.
- Innovative new scrub deck concept, the deck moves from side to side when turning the steering wheel.
- Activation of low noise level mode can reduce the noise levels further for daytime cleaning in noise sensitive areas.
- Patented automatic speed control which automatically reduces speed when turning or driving on a ramp.
- Parabolic, break-away squeegee picks up all the water even on tight turns. If the squeegee accidentally hits obstacles it will slide off the machine to protect both the machine and the obstacle.
- Excellent ergonomics; large comfortable seat, adjustable steering wheel and low foot platform which enables the machine to be accessed from both sides.
- All wheels including those on the scrub deck and squeegee are non marking.
